PROJECTS

Sheridan College

- Created front-end of an application using FIGMA which gives deals to the customers. (available on cuteagrawal.com)
- Developed an Inventory look-up system with a login and signup feature using JAVA programming language.

HACKATON

Hack for Good 2022

- Won the First position and \$2500 prize.
- Created a prototype of an application that helps a user with ADHD to focus.
- The application starts with a game and helps the user to calm down.
- It also records the data and shares it with the doctor.
- It also features a premium section that can benefit the user and help with development costs.
- Presented it to the judges.
- Highlight: It was the first time at a single participant won in that hackathon against groups.
